

| #   | Name                                                                            | Price (RON) |
|-----|---------------------------------------------------------------------------------|-------------|
| 1.  | Integral ceramic crown - e.max ceram on e.max press                             | 590         |
| 2.  | Pressed ceramic crown (monolithic e.max press) lithium disilicate               | 520         |
| 3.  | Inlay / Onlay / Overlay e.max press                                             | 490         |
| 4.  | Ceramic crown on zirconia framework                                             | 590         |
| 5.  | Zirconia 3/4 crown with vestibular ceramic layering                             | 530         |
| 6.  | Monolithic zirconia crown                                                       | 455         |
| 7.  | Ceramic crown on zirconia framework on implant (cemented)                       | 670         |
| 8.  | Ceramic crown on zirconia framework on implant (screw retained)                 | 710         |
| 9.  | Zirconia 3/4 crown with vestibular ceramic layering on implant (cemented)       | 600         |
| 10. | Zirconia 3/4 crown with vestibular ceramic layering on implant (screw retained) | 640         |
| 11. | Pressed ceramic crown (monolithic e.max press) on implant                       | 640         |
| 12. | Monolithic zirconia crown on implant (cemented)                                 | 535         |
| 13. | Monolithic zirconia crown on implant (screw retained)                           | 575         |
| 14. | Zirconia hybrid abutment                                                        | 365         |
| 15. | Custom premill abutment                                                         | 450         |
| 16. | 3D print abutment                                                               | 250         |
| 17. | Gingival reconstruction (depends upon the case)                                 | 70 – 420    |
| 18. | Veneer (e.max press + mimetic layering)                                         | 650         |
| 19. | Veneer on refractory die                                                        | 730         |
| 20. | Metal ceramic crown (premium) IPS Style Ivoclar                                 | 270         |
| 21. | Ceramic shoulder                                                                | 100         |
| 22. | Metal ceramic crown on implant (cemented)                                       | 470         |
| 23. | Metal ceramic crown on implant (screw retained)                                 | 500         |
| 24. | Mouth guard (bruxism/whitening/contention/preparation guidance)                 | 120         |
| 25. | Injection template mouth guard                                                  | 150         |
| 26. | Analog / digital wax-up (per element)                                           | 30          |
| 27. | Study model (per arch)                                                          | 25          |
| 28. | 3D printed model (impression)                                                   | 200         |
| 29. | 3D printed model (STL)                                                          | 125         |
| 30. | Block-bite (photo resin)                                                        | 100         |
| 31. | Custom block-bite (3D print)                                                    | 250         |
| 32. | Custom impression tray                                                          | 50          |
| 33. | Inlay composite Nexco Ivoclar                                                   | 250         |
| 34. | Composite crown (milled)                                                        | 330         |

|                                                             |                                                            |     |
|-------------------------------------------------------------|------------------------------------------------------------|-----|
| 35.                                                         | Composite multilayer crown                                 | 400 |
| 36.                                                         | PMMA Cad-Cam provisional crown                             | 120 |
| 37.                                                         | PMMA Cad-Cam provisional crown on implant (cemented)       | 180 |
| 38.                                                         | PMMA Cad-Cam provisional crown on implant (screw retained) | 220 |
| 39.                                                         | Zirconia DCR                                               | 325 |
| 40.                                                         | Metal DCR (laser melting)                                  | 190 |
| <i>Shade and colour identification service is included.</i> |                                                            |     |
